PROFESSIONAL SUMMARY

Software engineer with 4 years of experience building product and platform systems in React, TypeScript and Node.js on AWS. Comfortable owning a service from design doc to on-call. Two internal tools I built are used company-wide.

WORK EXPERIENCE

Nimbus Labs - Software Engineer II, Bengaluru, India

March 2023 - Present

- Built a self-serve billing console (React, TypeScript, Node.js, PostgreSQL) used by 12,000 merchants; reduced billing support tickets by 50%.
- Migrated 40+ REST endpoints to typed OpenAPI contracts with generated clients, cutting frontend/backend integration bugs from 90 to 10.
- Led OpenTelemetry + Grafana rollout across 6 services; p95 error-rate alert noise down 60%, MTTR from 42 min to 11 min.
- Mentored 3 junior engineers; ran weekly design-review office hours.

FinEdge - Software Engineer Intern -> SDE I, Gurugram, India

July 2021 - February 2023

- Shipped a KYC document ingestion pipeline processing 80,000 documents/day using Node.js, S3 and Textract; p99 latency 1.9 s.
- Wrote a Playwright + Jest integration harness that halved release QA time (from 6 h to under 3 h per release).
- Reduced monthly AWS spend 18% (\$7.2k/mo) by moving batch jobs from EC2 to Lambda with SQS dead-letter handling.

PROJECTS

- ledger-ui - open-source React component library for financial tables; 480 GitHub stars, 9k weekly npm downloads.
- querylab - SQL playground with Docker, Redis caching and row-level security demo; used by 2 university courses.

EDUCATION

Vellore Institute of Technology - B.Tech, Computer Science and Engineering, 2017 - 2021, CGPA 8.4/10

Relevant: Distributed Systems, Databases, Algorithms, Statistics (minor)

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Go (learning)

Frontend: React, Next.js, Redux Toolkit, Tailwind, Jest, Playwright, Storybook

Backend: Node.js, Express, Fastify, GraphQL, REST/OpenAPI, gRPC basics

Data: PostgreSQL, MySQL, Redis, MongoDB, Kafka, Airflow (light), dbt (light)

Infra: AWS (ECS, EC2, Lambda, S3, RDS, CloudFront), Docker, Kubernetes (basic), Terraform (basic), GitHub Actions, ArgoCD

Practices: TDD, trunk-based development, observability, incident response, design docs, A/B testing

CERTIFICATIONS

AWS Certified Developer - Associate (2024) - Google Professional Cloud Developer (2025)

AWARDS

Nimbus Labs "Ship It" award 2024 - VIT ACM chapter lead 2019-2021
